RECOMMENDATION

by

"ANGLO-AMERICAN SCHOOL IN SOFIA",

Sofia, Municipality Region "Lozenets", 16 Koziak Str.,

tel.: (+359 2) 923 8810 Fax: (+359 2) 923 8859

represented by Mr. James Henry Leahy

With the present recommendation we would like to express our great appraisal for the joint projects fulfilled up to the present moment together with company **"MMV-ENGINEERING" EOOD**, with head office address in Sofia, 9 Akad. Stefan Mladenov Str., represented by the Manager – eng. Mihail Mateev Valchanov.

The company has supervised the design elaboration and the construction of the following site:

"INTERNAL RECONSTRUCTION OF THE ANGLO-AMERICAN SCHOOL IN SOFIA",

(internal reconstruction, change of use and reorganization of:

level +3,80 – Teachers Room, Science Room;

level ±0,00 – two Music Rooms with three Practice Rooms, Art Admin Room with Art store; I

level -4.00 – Nurses Suit, GSO Office, Maintenance Workroom, Store,

Black Box Theatre with two Stores and New Store)

situated in RLP VIII– 518, quarter 7, district "Detski grad" pursuant to the urban plan of Sofia, Region "Pancharevo" – Sofia Municipality

The total value of the executed construction and assembly works at the site amounts to approximately 1 200 000 /one million and two hundred thousand/ levs.

The works on the project started in June 2009 and ended in august 2009 with the issuance of Operation Permit for the site.

We chose "MMV-ENGINEERING" EOOD because of their experience, excellent references and professionalism.

During our common work "MMV-ENGINEERING" EOOD executed the contractual obligations professionally, with responsibility and in due time, standing by all legal regulations and normative requirements.

The performed services for site supervision were in the following scope:

- Assessment of the compliance of the investment design;
- Lawful commencement of the construction – opening of the site and determination of built up line and level;
- Preparation of all acts and protocols during the construction;
- Execution of the construction site pursuant to the approved design;
- Control for the quality of the building materials and products and verification of their conformity to the state standards for safety;
- Avoidance of damages and injuries to third persons and their property during the construction;

- Correct execution of the construction and assembly works;
- Suitability of the site for commissioning;
- Preparation of Final report to the Employer in order to ascertain the suitability of the site for usage.

We would like to express our satisfaction with the professionalism of the team of "MMV-ENGINEERING" EOOD, as well as their prompt reaction and response to any questions and new requirements set by our side. We would like to recommend "MMV-ENGINEERING" EOOD as a responsible partner with exceptionally effective and reliable way of working

Date: 29 January 2013
